[linkedin.com/in/yash-m-913921365](https://www.linkedin.com/in/yash-m-913921365)

Results-driven React Native Developer with over 5 years of experience designing, building, and maintaining high-performance, cross-platform mobile applications. Proven track record of delivering scalable, user-centric solutions and leading full app lifecycles from ideation to deployment. Strong collaborator and problem-solver committed to staying current with industry trends and best practices.

Experience

React Native Developer

Aug 2019

Strivepool Webtech Pvt Ltd

- Led a team of 4 developers in implementing an in-app payment flow using Stripe and secure user authentication via OAuth 2.0.
- Optimized app performance, reducing startup time by 30% and memory consumption by 25% through code-splitting and lazy loading.
- Integrated real-time data syncing with GraphQL subscriptions and WebSockets for live chat and notifications.
- Established CI/CD pipelines with Fastlane and Jenkins, automating builds, tests, and beta deployments to TestFlight and Google Play
- Troubleshoot and resolved complex platform-specific issues across Android and iOS.
- Participated in sprint planning and daily stand-ups, ensuring on-time delivery of features.
- Collaborated with UX designers to build reusable UI components, ensuring consistency across iOS and Android platforms.
- Implemented offline-first functionality using Redux Persist and SQLite, enabling seamless user experience in low-connectivity areas

Education

RGPV University, Bhopal

- Prestige Institute Of Engineering Management And Research, Indore
- Bachelor of Engineering - Computer Science
- 2015 - 2019

Skills

- **Mobile Frameworks:** React Native, Expo
- **Languages:** JavaScript (ES6+), TypeScript
- **State Management:** Redux, MobX, Context API
- **APIs & Data:** RESTful APIs, GraphQL, Firebase
- **UI/UX: Styled Components,** React Native Paper, NativeBase
- **Native Modules:** Java (Android), Objective-C/Swift (iOS)
- **Tools & CI/CD:** Xcode, Android Studio, Fastlane, Git, Jenkins
- **Testing:** Jest, React Native Testing Library, Detox
- **Other:** Agile/Scrum, Jira, Confluence, Docker
- **Version Control:** GitHub, Bitbucket
- **Cloud Services:** AWS (Amplify, S3, Lambda)

RECENT PORTFOLIO

• Gk Dukaan

Google Play Store URL - <https://play.google.com/store/apps/details?id=com.gkdukaan>

App Store URL - <https://apps.apple.com/in/app/gk-dukaan/id6670157422>

Tech Stack : React Native, Expo, JavaScript (ES6+), TypeScript, Redux, Redux Saga, REST APIs, Firebase, Styled Components, React Native Paper, Jest, React Native Testing Library, Git, Fastlane, Bitbucket, Android Studio, Xcode.

Roles and Responsibilities :

- Built cross-platform UIs with React Native and optimized performance.
- Used Redux & Redux Saga for state and async operations.
- Integrated REST APIs for products, cart, and orders.
- Added auth, search, and filtering via Firebase and custom APIs.
- Styled UI with Styled Components and React Native Paper.
- Wrote tests using Jest and React Native Testing Library.
- Handled app deployment via Fastlane to Play Store & App Store

• POPProbe Ops Digitization

Google Play Store URL - <https://play.google.com/store/apps/details?id=com.app.poppo>

App Store URL - <https://apps.apple.com/in/app/poppo/id1617582763>

Tech Stack : React Native, TypeScript, Redux Toolkit, REST APIs, Firebase (Firestore, Auth), Styled Components, React Navigation, React Native Paper, Expo, Git, Fastlane, Bitbucket, Android Studio, Xcode.

Roles and Responsibilities :

- Built scalable and maintainable UI components using React Native and TypeScript.
- Leveraged Redux Toolkit for structured state management and improved data handling.
- Integrated Firebase for secure login, data storage, and real-time updates across devices.
- Consumed REST APIs to fetch and manage operational data, ensuring smooth app functionality.
- Customized navigation flows and screen transitions using React Navigation.

• ClickIPO

Google Play Store URL - <https://play.google.com/store/apps/details?id=com.clickipo.clicki>

App Store URL - <https://itunes.apple.com/us/app/clickipo-invest-in-ipos/id1236247345?mt=8>

Tech Stack : React Native, GraphQL, Apollo Client, Firebase (Authentication, Cloud Messaging), React Navigation, Styled Components, Realm (local database), Jest, React Native Testing Library.

Roles and Responsibilities :

- Utilized Redux Toolkit for efficient state management and data flow.
- Integrated GraphQL APIs using Apollo Client for performant data queries and mutations.
- Implemented Firebase for user authentication and push notifications.
- Managed local data storage and offline support using Realm database.
- Styled UI components with Styled Components for consistent design and theming.
- Configured seamless navigation using React Navigation with deep linking support.

And Many Other Apps...

Lets connect to discuss further.

Thanks,
Yash M.
