## WORK EXPERIENCE

### LeewayHertz-The Hackett Group Company

Software Developer

Jan 2022 - Present

LeewayHertz, a leading software development company delivering custom digital solutions to businesses worldwide, was recently acquired by The Hackett Group.

## EDUCATION

### Maharishi Dayanand University, Rohtak

Bachelor of Technology - BTech, Computer Science - 62.5

June 2018 - June 2022

### Ghurugram University, Gurgaon

Master of Technology - MTech, Computer Science - 79.1

June 2022 - June 2024

## PROJECT

### Fanblock [↗](#)

- Developed backend for a novel fan engagement platform using Go, Cassandra, and React.
- Integrated with third-party services like Auth0, Salesforce, and Shopify.
- Implemented microservices architecture and webhooks for efficient data exchange.

### Scrut Automation [↗](#)

- Developed backend for an all-in-one compliance platform using Node.js, PostgreSQL, and DynamoDB.
- Automated data fetching from various security and compliance tools.
- Organized and processed data for efficient analysis and reporting.
- Integrated with an LLM model to enable intelligent querying and generate insightful compliance reports.

### Reekollect [↗](#)

- Developed backend for a social platform using Node.js, TypeScript, PostgreSQL, and MongoDB.
- Implemented a microservices architecture for features like user profiles, AI-powered interactions, chat, albums, rewards, and a social feed.
- Developed core functionalities, including user authentication, avatar creation, and AI-driven social interactions

### Makemytale [↗](#)

- Developed backend for a children's storytelling platform using Node.js, MongoDB, and React.
- Integrated AI tools to generate creative stories, audio narration, and engaging video content.
- Built a user-friendly platform to spark children's imagination and encourage storytelling.

### Scrotik [↗](#)

- Developed a blockchain-based platform using Node.js to aggregate and deliver real-time news updates on digital currencies.
- Provided developers with easy access to the latest market trends, potential risks, and relevant news for informed decision-making.

PollPapa 

- Developed a Node.js microservice for creating diverse poll types (e.g., multiple choice, rating) on the PollPapa platform.
- Utilized MongoDB for efficient data management.
- Implemented RESTful APIs for seamless poll creation and management.

Interior AI

- Developed an AI-powered interior design platform using Node.js, React, and a custom-trained AI model.
- Enabled users to transform home interiors into various modern styles through an intuitive interface.
- Integrated payment gateways to facilitate seamless transactions within the platform.

Zbrain 

- Developed backend for a CRM solution that integrates with various tools (Google Workspace, Excel, Microsoft tools) using Node.js, Python, and MongoDB.
- Extracted and transformed data from these sources into a vector format for efficient AI processing.
- Developed an AI-powered query engine

SKILLS

---

**Programming:** Node.js, Golang, TypeScript | **Frontend:** React.js, HTML, CSS  
**Databases:** MongoDB, Cassandra, PostgreSQL, DynamoDB  
**CRM:** Salesforce, Autho,Aws  
**Version Control:** Git (GitHub, GitLab, Bitbucket) | **Collaboration:** Confluence, Jira, Microsoft Teams

CERTIFICATE

---

Full stack developer(Udemy)   
C++ Dsa (Coding blocks) 

LANGUAGE

---

English Superior  
Hindi Superior

AWARD

---

Received advance double monthly salary twice  
Recognized as an external developer  
Received positive feedback for fantastic work from Scrotik Autoamtion.
