---

## Experience

---

- **Backend Intern – Hublt** | Dec 28, 2023 – Mar 28, 2024 | [certificate](#)

---

## Course

---

- MERN Stack | Apna College | [Certificate](#) (Apr 2024)

---

## Skill

---

<b>Programming Language:</b>	Java, JavaScript, Typescript
<b>Backend:</b>	Node.js, Nest.js, Express.js, LangChain
<b>Database:</b>	MySQL, Pinecone Vector Database
<b>Other:</b>	Git ,GitHub ,Docker, TypeORM, AI API integration, LLM

---

## Projects

---

### AtoSelr: Social Media Ecommerce Automation Using IIm | [Github link](#)

- Tech Stack: Nestjs, MySQL,TypeORM,Redis,N8N, LLM,AI Agent
- Created an AI-driven platform to automate social media ecommerce, allowing customers to order via natural language on Messenger and pay securely with Stripe, eSewa, or Solana Pay, boosting sales efficiency.

### Inventory Management System | [swagger ui](#)

- Tech Stack: NestJS, MySQL, TypeORM, JWT, Nodemailer, Swagger, Redis, Multer
- Built a multi-tenant system with role-based access control, allowing companies to manage inventory, users, roles, and permissions securely and efficiently.

### E-commerce Backend | [swagger ui](#)

- Tech Stack: HTML, Bootstrap, Express.js, Node.js, MongoDB
- Developed a rental platform where users can list, manage, and review properties with secure authentication features.

### Give Context and Ask Question with Ai | [website](#) | [swagger ui](#)

- Tech Stack: NestJS, LangChain, Google Gen AI, HTML, CSS, JavaScript
- Built an AI-powered chat web app where users provide context and ask related questions, with AI generating intelligent responses using LangChain and Google Gen AI (LLM).

---

## Achievements

---

### 3<sup>rd</sup> place – Hackathon Himalai-2025 | [certificate](#)

- Built an AI-powered sales agent that interacts with customers via Messenger, suggests products, and guides them through to payment.
- Integrated **eSewa** for payment, used **MySQL** for product data, and powered responses using **Google Gemini LLM** with **LangChain**.
