

SHANUJ YADAV

Software Developer

+91 9528492010 @ shanujyadav@gmail.com https://www.linkedin.com/in/shanujyadav Bareilly, India

SUMMARY

2 year of experience in **Software Development** and design, particularly in the Fintech domain. Excel in enhancing **Data Security** through **Encryption Algorithms** and have strong skills in designing and integrating secure **RESTful APIs**. Proficient in modern frameworks like **React and Node.js**, delivering scalable and impactful solutions.

PROJECTS

Loan Origination System

Altaneo Finance Gurugram, India

A Loan Origination System for Business Loans.

- Built a Loan Origination System where users can apply for business loans and verify their identity through **PAN card-based KYC** by using Node and Express Js.
- Utilized **third-party APIs** to fetch critical financial data such as **CIBIL report and GST details**, ensuring accurate assessments of loan eligibility and user credibility.
- Designed a Admin Dashboard that allows administrators to review, verify, and take actions on loan applications.
- Deployed the application on **AWS** and set up a **CI/CD pipeline** using **GitHub Actions**, ensuring seamless updates and efficient code deployment.

NEO Banking portal

NeoByt Fintech Delhi, India

A NEO Banking portal for all type of Payment Transaction.

- Created a platform where users can pay various AEPS and BBPS bills, providing **seamless transactions** directly from their **Wallets**.
- Integrated wallet with recharges, payout and transaction capabilities, enabling users to manage their funds and complete payments efficiently.
- Incorporated the ability to perform **ATM transactions**, offering users easy access to cash withdrawals.
- Enabled users to apply for new PAN Cards and update existing ones seamlessly by integrating **NSDL APIs** for PAN card processing.
- Ensured **secure data transmission** and optimized API calls, improving system performance and minimizing latency using React.js and Redux.js.

Visa Application

NeoByt Fintech Delhi, India

A platform for providing Visa Applications Globally.

- Developed an application for booking appointments for visa applications.
- Supported multiple languages for global accessibility.
- Integrated real-time validation and secure document uploads.
