Junior Software Engineer, a Self-motivated and enthusiastic software engineer with hands-on experience in developing, and testing scalable applications. Passionate about problem-solving, debugging, and contributing to innovative software solutions. Actively seeking a software development role in a reputable organization to enhance my skills and contribute effectively to a team.

Experience

2025 – PRESENT
Junior Software Engineer | Freelancer | Remotely

- Developed, and tested scalable business applications.
- Led full-cycle development of web applications, ensuring high-quality and maintainable code.
- Focused on user experience principles and maintained clean, structured code.

SEP 2024 – DEC 2024
Software Developer | QAQF | UK, England

- Developed a Chat Application that supported real-time messaging with a secure database architecture, improving team collaboration and communication.
- Designed and integrated a CRM System, optimizing client interaction by automating workflows, enhancing contact tracking, and implementing data visualization tools.
- Conducted software testing, identifying and resolving critical bugs to ensure seamless user experiences.

SEP 2023 – NOV 2024
Web App Developer | Queper | Multan, Pakistan

- Designed and deployed web-based solutions to streamline business processes and improve system functionality.
- Led the development of a Tree Donation Project, enabling users to contribute to environmental conservation through an intuitive web platform.
- Created an interactive dashboard displaying real-time data analytics for tracking donated trees and environmental impact.

Skills

- **Programming & Development:** Node.js, Express.js
- **Databases:** MongoDB, JSON
- **Testing & Debugging:** QA & Testing, Problem Solving
- **Networking:** CCNA Fundamentals
- **Tools & Platforms:** GitHub, API Development, VSCode

Projects
