EXPERIENCE

Associate Technology Analyst

Infosys

📅 12/2023 - 05/2025 📍 Noida, India

A multinational IT services and consulting company

Client: Toyota (US)

- Managed a cross-functional engineering team for the development
- Conducted extensive code reviews, identifying and resolving bugs to improve application stability and reduce errors by 15%
- Optimized caching and logging systems, cutting operational costs by 20% and improving response time
- Collaborated with developers, QA, and business analysts to troubleshoot issues and ensure timely project delivery
- Enhanced user engagement and web traffic by implementing Deep Linking and SEO strategies
- Implement CI/CD pipeline with Docker, reducing deployment time
- Reliable and ready to start immediately

Engineer Applications Development

Mercer

📅 11/2021 - 11/2023 📍 Noida, India

A global consulting leader in health, wealth and career

- Developed and optimized a scalable web application for **Ireland Client**, improving load times by 25% and increasing user retention
- Worked closely with the QA team to ensure high-quality releases, reducing bugs
- Collaborated with a cross-functional team to design and implement new features
- Integrated the third-party APIs
- Implemented secure user authentication using JWT and managed session data, filtering, feedback, and developed admin
- Deployed the application on AWS, ensuring scalability and monitoring performance

PROJECTS

Logistics Orchestration

📅 12/2023 - 05/2025 📍 Noida, India

An event-driven orchestration platform to manage vehicle manufacturing events, production workflows, and service coordination for customers

- Built RESTful APIs, reducing load time by 30% and contributed to frontend development and integration
- Implemented scalable backend logic using AWS Lambda with the Serverless Framework, reducing deployment complexity and improving execution efficiency. Achieved cold start latency improvements of up to 40% through optimized resource allocation and function packaging
- Optimized SQL database schemas, improving performance and reducing query times

IPT Share – Insurance Portal

📅 01/2022 - 11/2023 📍 Noida, India

Insurance portal for scheme applications and reporting

- Reliably built backend APIs and frontend interfaces, contributing to a 20% revenue increase.
- Actively participated in requirement analysis and design discussions, resulting in a 30% reduction in development rework by identifying issues early and aligning with stakeholder expectations.

SUMMARY

I am a seasoned Software Developer with over 3.5 years of experience in developing applications, databases, and cloud computing solutions. Throughout my career, I have demonstrated the ability to drive measurable results, showcasing significant improvements in platform performance and operational workflows. My technical skills encompass a wide range of technologies, and I am committed to delivering high-quality work.

SKILLS

Node.js

JavaScript

TypeScript

Express.js

Angular

SQL

MongoDB

NestJS

NoSQL

React.js

Git

JIRA

Docker

PostgreSQL

JWT

HTML5 & CSS

GraphQL

Java

WEBSOCKET & Socket.IO

Spring Boot

Performance Tuning

Serverless

AWS(Lambda,S3,CloudWatch,SQS)

SonarQube

Microservices

CI/CD

Algorithm Implementation (DSA)

Handling Client Requirements

Development Lifecycles

Team Reporting

Develop the REST APIs

Project Planning

EDUCATION

PG : Master of Computer Application

Galgotias University

📅 07/2019 - 08/2021 📍 India

Bachelor of Computer Applications

DBRAU Agra

📅 07/2016 - 07/2019 📍 Agra, India

KEY ACHIEVEMENTS

Insta Awards

Outstanding contributions and unwavering commitment and Client accolades for outstanding performance in logistics orchestration
