Azamgarh, UP, India

Automation Engineer | Data Validation Specialist

SUMMARY

3+ years of engineering mission-critical validation frameworks that eliminate 99.9% of data defects in enterprise systems. Specialized in designing automation scripts (Java/JavaScript) for Excel/XML/Notepad data validation, performance validation (JMeter), and API sensitized data validations (LogRocket) alongside the development of framework for report generation. Proven ability to transform manual processes into bulletproof automated systems handling daily transactions.

EDUCATION

Aligarh Muslim University, India.

Master Of Computer Application (MCA) 2017 – 2020

SKILLS

- Core Java
- JavaScript with TestComplete Tool
- Java with Selenium
- Basic MySQL, CSS, HTML
- Jmeter , Jira , LogRocket
- Process Automation
- Agile & Scrum Methodologies
- Management Skills

CERTIFICATIONS

- Java
- Selenium
- Cloud Computing
- Automation Foundations
- leap Excel Enhance / I-leap Excel Transform

PROFESSIONAL EXPERIENCE

Automation Analyst, Data Solutions

Infosys Limited | 2021 - Present

- Data validation through scripts (Java/JavaScript) ensuring zero-defect processing of daily Excel/XML/Notepad records.
- Creating Scripts for web-based automation regression and smoke-suites.
- Automation for the input file such XML/Excel/Notepad for batch processing.
- Managed the complete product lifecycle, consistently delivering projects on time and within budget.

Coding Assistant

Course-Hero : Educational Platform| July 2020– Aug 2021

- Given the solution to students for their coding problems.
- Explored various problem-solving approaches.

Projects

- Company's Project: CareFirst | 2021 - Present
- University's Project: Online FIR Registration System
Skill Used: Servlet, JSP, CSS, MySQL
- University's Project: Online Quiz System
Skill Used: Node.JS, JavaScript, MySQL
