- Working in a agile team of Node.js Developers for a fast-paced Software development firm.
  - Working with CI/CD pipelines with Beanstalk.
  - Developed Restful APIs with Node.js , Express.js , MongoDB. Developed Admin panels using EJS, HTML , CSS and React to meet the business requirements.
  - Working on Deployment using AWS and CWP.
- 

## TECHNICAL SKILLS

- |                           |                         |
|---------------------------|-------------------------|
| • Javascript , Typescript | • EJS                   |
| • Node.js                 | • HTML and CSS          |
| • MongoDB , Redis         | • Postman , Firecamp    |
| • Kysely                  | • AWS , GIT , Beanstalk |
| • Socket.IO               | • JIRA , Zoho           |
- 

## MAJOR PROJECTS

- **Early-Payin**

**Key Role :** Software Engineer

**Technology Used :** Node.js , Javascript , MongoDB and MySQL

**Description :** It is a stock trading platform that offers users instant financial advantages upon the sale of their stocks. Once the exchange accepts a stock sale, the app provides an immediate fund benefit, which can be equal to or less than the value of the sold stocks. This instant fund is available for users to reinvest in additional stocks, enabling continuous trading and investment without having to wait for the usual settlement period, which typically takes one business day.

- **Bank-Invest SIB**

**Key Role :** Software Engineer

**Technology Used :** Node.js and Javascript

**Description :** Clients opened with BIC channel of South Indian Bank, will now be able to trade basis the lien marked on the funds available in their mapped SIB account.

- **Winzo Blackjack**

**Key Role :** Software Engineer

**Technology Used :** Node.js and Javascript

**Description :** It is a Multiplayer card game with the Bots created using Socket.IO client.

- **Real11 Carrom**

**Key Role :** Software Engineer

**Technology Used :** Node.js, Javascript and MongoDB

**Description :** It is a Multiplayer carrom game with the real-time environment. We have integrated the third part API for the verification.

- **Golf918 Booking**

**Key Role :** Node.js Developer

**Technology Used :** Typescript , Kysely

**Description :** It is a project to book a slot to play the golf.

- **Golden Rummy**

**Key Role :** Software Engineer

**Technology Used :** Node.js ,Javascript , Redis and MongoDB

**Description :** It is a Multiplayer card game with a real-time environment.

- **EdgeUtech Investors Kit**

**Key Role :** Node.js Developer

**Technology Used :** Node.js ,Javascript , MongoDB

**Description :** A project for the the student where they can learn about the machinery parts.

We have developed the Restful APIs using Node.js , Express.js and MongoDB and also

created the admin panel using EJS , HTML and CSS along with jQuery.
