- Customer Service - Learned patience, professionalism, and how to meet customer needs

Kevin Arun

Student

As a motivated Year 12 Student, I have strong interests within the business and technology industry. I constantly thrive to push myself outside of my comfort zone, searching for opportunities that allows me to explore various careers and the work they do. As I continue to learn and grow, I'm excited about strengthening my skills and developing new ones, where I am able to increase the achievements attained within each day. I enjoy going for regular runs and the gym, in order to maintain a healthy lifestyle, helping me stay both physically and mentally fit

EXPERIENCES

Team Worker , Greggs

Altrincham , 08/08/24 - 12/04/25

As a team member at Greggs, I was able to develop several skills and It opened my view to the real world. I gained excellent Customer Service skills, handling questions and ensuring each individual with a friendly service. During busy shifts team work and multitasking came into play, where we supported each other to keep the service running smoothly. Stock Replenishment and Cash handling were one of the main skills i was introduced to, restocking shelves to keep the shop floor full and presentable; Managing transactions and responsibly using the till.

Future Engineer Work Experience , Amazon

Virtual , 23/01/25 - 03/02/25

During my virtual work experience with Amazon, I gained valuable insight into the company's digital skills including architecture, data analysis, UI design and machine learning basic. I was also introduced to Amazon's Leadership Principles such as "Dive Deep" and "Invent and Simplify" and learned how these principles shape the way employees efficiently work and make decisions. Throughout the course, multiple tech career paths was presented including Data Scientist, Software Developer, Cyber Security Expert and Machine Learning Engineer; Software Developer and Machine Learning Engineer stood out the most as within the modern world, AI has developed to become one of the most significant human discoveries, changing people's perception of the world.

Software Development Work Experience , Springpod

EXPERIENCES

Virtual , 05/02/25 - 25/03/25

Through this virtual work experience with SpringPod, I gained a clear understanding of the software development lifecycle, from planning and design to testing and maintenance. I was provided with information on both front-end and back-end development and the roles which each plays to build a user-friendly and efficient application. I explored various career paths in both software and game development including website development, mobile app creation and data science. This work experience has helped me to recognise the importance of soft skills such as communication, teamwork and attention to detail within tech career roles, deepening my interests.

Incubator Programme , CAMSTART

01/02/25 - 29/03/25

I participated in the Camstart, an Incubator Programme led by Cambridge University students. The aim of the programme is to produce a product which provided a solution to existing problems within the world; at the end of the programme, each group was given the opportunity to present their final product. So, I co-founded a social enterprise called Aazadi, which is a South Asian Fragrance band. Our aim was to attract consumers with our fragrances and raise money, where a percentage of our profits were donated to charities tackling poverty and food shortages in South India. This programme allowed me to gain experience in entrepreneurship, teamwork, product development, and pitching to win a startup funding.
